Valued DMG Patient:

As part of the District Medical Group (DMG) family, we want to ensure you know we are here for you. Throughout the COVID-19 pandemic, DMG locations across the Valley have remained open to support the health of our patients.

We understand you may have concerns about leaving your home right now, especially if you or a family member is not feeling well and needs medical care. We are employing safety measures recommended by the Centers for Disease Control and Prevention (CDC) to protect you and your family as well as our staff, including:

- **Safe screening practices** for all patients and families prior to an in-person office visit
- **Availability of telehealth appointments**, as appropriate, so you can meet with your DMG provider safely and securely from home
- **Enhanced office cleaning** and personal protection procedures, with hand sanitizer readily available in our locations
- **Social distancing** measures at check-in, checkout and in our waiting rooms, including rapidly moving patients that are sick to a private room
- **Use of masks and face shields** by all providers and staff while caring for our patients,
- **Providing cloth facial coverings to patients and a required family member** entering the clinics without a cloth masks

Whether you or a family member needs to visit a DMG primary care location for preventive care (i.e. annual exams, screenings or vaccines), treatment of seasonal allergies or illness, behavioral health support, or management of a chronic or complex condition, we are here for you, providing a safe, clean environment.

Our DMG primary care and behavioral health locations are open and available for in-person and telehealth appointments. Contact the desired location to get the care you need when you need it:
